

## Process Safety Management made easy!

Introducing our NEW **web-based PSM Compliance Management software** created to help our customers comply with OSHA's Process Safety Management and EPA's Risk Management requirements.

### OUR MISSION

We want to take the guess work out of OSHA's Process Safety Management and EPA's Risk Management. With very powerful notification features, this software will alarm for every element required by OSHA and EPA, as well as your state's Tier II reporting requirement.

As federal OSHA and EPA regulations change, so will the software, making it *effortless* to comply with any regulation changes.

### HOW IT WORKS

Our Compliance experts will assist you in developing your programs, as well as train you on how to use the unique software applications. Digitizing your PSM, RMP and ARM documents will make it easy to comply with OSHA and EPA regulations.

### FEATURES

The features available in this software make creating your PSM, RMP and ARM programs very easy!

- OSHA & EPA PSM/RMP/ARM utility
- Program & documentation management
- Upcoming and elapsed inspection, audit and training notifications
- Unlimited digital inspection records. No more digging through file cabinets!
- Employee training & participation management
- Redundant off-site backups of your PSM/RMP/ARM program
- Secure, cloud-based PSM/RMP/ARM platform accessible from anywhere and no extra software to install
